# Mr Rakha — Reference Bank

Oct 7, 2026 · @Nosseir

The first live run says three mechanics win in this niche: exam stakes in a numbered list, contrarian real-world claims, and everyday-life stories in Egyptian voice. Rakha's Briefs and exam reels should be built on exactly those, filtered through his calm, witty Analyst persona.

## The list

Six accounts to start, with 6–14 more to add once Apify is connected. Scores run 1–5 (overlap · performance · transferability · personality · recency).

| Tier | Account | Handles | Why it's here | Score | Data status |
|---|---|---|---|---|---|
| A. Competitor | Assem El Nady | IG igbusinessassemelnady · TikTok igcsebusinessassemelnady | Closest Cairo IGCSE Business rival | 4.0 | Live via Apify ✓ (7 Oct) |
| B. Niche benchmark | EconplusDal | YouTube EconplusDal | UK A-level economics teacher; exam-mark content that wins | 4.4 | Live ✓ |
| B. Niche benchmark | tutor2u | IG tutor2u | UK business/econ revision brand, short-form | 3.8 | Dropped: dead account (2,333 followers, product ads with 0–8 likes) |
| B. Niche benchmark | Economics Explained | YouTube EconomicsExplained | Real-world economics with bold claims; the "Brief" ceiling | 4.0 | Live ✓ |
| C. Local style | El Da7ee7 | YouTube Da7ee7 | Egypt's best edutainment voice; personality and storytelling | 4.6 | Live ✓ |
| D. Mechanic source | (to add) | — | Business-breakdown shorts and documentary-style creators | — | Next run |

Still to add: 2–4 more Cairo IGCSE Business/Econ tutors (from parent groups), plus Egyptian finance explainers on TikTok.

# Live data (7 Oct 2026)

The first run pulled 90 YouTube videos (last 30 per channel) from GitHub's servers. Instagram and TikTok blocked those servers, so their numbers wait for Apify.

| Account | Subscribers | Median views (last 30) | Videos at ≥2× own median |
|---|---|---|---|
| El Da7ee7 | 2,520,000 | 600,500 | 8 of 30 |
| Economics Explained | 2,890,000 | 513,500 | 4 of 30 |
| EconplusDal | 403,000 | 14,000 | 7 of 30 |

List mode returns views and duration only: no likes, comments, dates or retention heatmaps. The full fields come with Apify. Raw files are in `intel/data/2026-10-07/` in the chispa repo (branch `claude/elegant-brown-yt0vko`).

## Apify run (7 Oct 2026): Assem El Nady, the main competitor

Assem wins on emotion and community, not teaching. Every one of his top videos is results day, students, memories or a "learning experience". None explains a business concept, so the real-world, exam-intelligence lane is open.

| Platform | Followers | Recent output | Typical views (median) | Top videos (plays) |
|---|---|---|---|---|
| Instagram | 14,050 (91 posts) | Reels, captions are hashtags only | — | "The Unforgettable Learning Experience" 721K · "Business & Psychology. Let's go!" 270K · "Online in all Arab countries" 259K |
| TikTok | 5,185 (81 videos, 193.5K likes) | ~3 a month | 12,650 plays (last 30) | "The Unforgettable Learning Experience" 900K · Aug 2026 slideshow 468K · "Business & Psychology" 385K · "June 26 Grades" 215K |

**What the data says:**

- **His brand line is "The Unforgettable Learning Experience"**, and it is his biggest video on both platforms. Rakha must not position on "experience". Rakha's line is intelligence: *Business, explained like it matters.*
- **Most shared:** "Grade for Life" (motivation; 504 shares, 168 saves) and "Spend a day with me at The Business Lounge" (399 shares, 299 comments). Day-in-the-life and identity content travels.
- **New since our first scan:** he added **IGCSE/A-level Psychology** (Aug 2026), runs a physical venue called **The Business Lounge**, takes registration via WhatsApp, and links to a teacher-review page. A sister account, @netkalembusiness, runs the "Netkalem Business Challenge", a student vs student quiz series.
- **Weak spots:** captions are hashtags only, there is no educational hook, and posting is uneven. Recent September videos got only 2–6K plays.

Cost of this run: 61 Instagram results × $0.0027 + 30 TikTok results × $0.0037 ≈ **$0.28**.

## Apify run 2 (10 Oct 2026): transcripts, comments, new competitors

**What Assem's top videos actually are:** his two biggest TikToks (900K and 385K plays) have almost no speech. They are music montages of classes and students. Their 40 comments are nostalgia and hearts ("miss this", "take me back", "will be so missed"). His audience is current and past students reliving the class, not new students being taught.

**The one talking video backfired with struggling students:** in "Grade for Life", he says A* students get the best jobs and lives, while C/D students struggle. The top comment (22 likes, 19 replies) reads: *"it's a struggle to even get Bs and Cs … I feel demotivated and such a failure by hearing this."* Others push back: "I never got an A* and now I have my own agency." **Rule for Rakha:** never grade-shame. His line is "a 5 is information, not a verdict".

**Competitors found by search (TikTok and Instagram):**

| Account | Followers | What they do | Threat |
|---|---|---|---|
| Marwa Sadek | 30 (TikTok), started 8 Oct 2026 | "Think Business Week" series: "learn Business by recognising it in the real world" | Same claim as Rakha, launched 2 days ago. Small, but proves the angle is getting crowded |
| Mohamed Saeed (Abouelnasr) | 5,875 IG · 166 TikTok | IGCSE/IBDP Business & Economics, 10 years, AUC/BUE/MBA credentials, "More than teaching" | Closest profile to Rakha (Business + Econ, 10 years) |

| Account | Followers | What they do | Threat |
|---|---|---|---|
| Karim Ashmawy | 7,816 TikTok | IGCSE Business, #ThinkBusiness, works with The IG School | Owns the "Think Business" phrase. Avoid it |
| Ahmed Marwan Economics | 2,085 IG · 964 TikTok | Economics O/A level, "خليك اقتصادي" | Economics specialist |
| Mahmoud M. Said | 1,701 IG | O-level Business & Economics | Direct, small |
| Ms Arwa Zak | 1,172 TikTok | Study tips (41K plays), concept questions | Tips format works |
| Mokhtar Atef · Mayada Fahmy ("Board Examiner") | <200 | "Business isn't memorising", real-world claims | Same claim, very small |

**Local mechanics worth borrowing (outside Business):** Dr Amr Hady (Chemistry), "3 things to do to get an A*": 40.6K plays, 1,555 shares, 845 saves. Mr Hayssam Hamouda (IGCSE): one video at 328.8K plays and 5,686 saves. Numbered, high-stakes lists earn saves in Egypt.

**Decision:** the claim ("real world, not memorising") is no longer unique, so the execution must be. That means the editorial look, the Brief numbering, the calm Analyst delivery and real examples, never a caption that just *says* it. Avoid the phrases "Think Business" (Karim, Marwa) and "more than teaching" (Mohamed Saeed). Move fast: the first Briefs should be live by 1 Nov.

## Mechanic cards

Three mechanics account for most outliers. Each card is decoded from titles and numbers; open the linked videos for the hook and structure before scripting.

| Mechanic | Evidence (× own median) | Why it works | Use for Rakha |
|---|---|---|---|
| **1. Exam stakes + a number** | EconplusDal: "5 BEAUTIFUL Micro Diagrams to STUN Paper 1 Examiners" 3.6× · "6 Paper 1 Mistakes That Will Cost You an A*" 2.4× · "5 POWER Macro Diagrams For Paper 2" 2.7×. Plain topic lessons sit at baseline. | Concrete count + named paper + a grade at stake = instant relevance and a save | Exam-mastery pillar: "3 sentences that lose the 'evaluate' marks", in calm Analyst tone, without the emojis and hype |
| **2. Contrarian real-world claim** | Economics Explained: "Finally a Country Is Taxing Its Billionaires" 2.5× · "Economics Is A Junk Science" 2.3× · "The Economy Gave Up On Young People" 2.1× | Bold, slightly provocative take on news people already feel | The Brief: lead with the claim, then the syllabus concept ("Your 'discount' isn't a discount") |
| **3. Everyday story in local voice, or a series** | El Da7ee7: football series "الكورة مع السلامة" 5–4× across 4 episodes · "فوائد التدخين" ("Benefits of smoking") 4.7× · "قصة اقتصاد عمتك" ("your aunt's economy") 3.8× | Counter-intuitive title + a familiar Egyptian life frame + humour; series compound | A numbered Brief series on everyday Egypt ("the economics of your school canteen"), told with Rakha's dry wit |

Not copyable: El Da7ee7's production scale, and EconplusDal's shouty thumbnails, which clash with Rakha's premium look. Borrow the mechanic, not the surface.

## Ideas and gaps

Six ideas that pass the four filters: Analyst persona, a Rakha signature, distance from the source, and one avatar. They go to idea-elevator next, then into the November calendar.

| Idea | Mechanic | Signature | Avatar |
|---|---|---|---|
| "3 sentences that lose your 'evaluate' marks": board, calm, one fix each | 1 | Board word + "…and that's how it's examined" | A* chaser |
| "The 2027 Business paper: 4 changes, 1 that matters" | 1 | The Brief dateline | Parent |
| "Your White Friday discount isn't a discount" (price anchoring) | 2 | The Brief No. 04 | A* chaser |
| "Free Wi-Fi in cafes isn't free" (cross-subsidy, loss leader) | 2 | Board word | A* chaser |
| Series: "The economics of your school day", 5 episodes (canteen, uniform supplier, school bus, tutor prices, exam fees) | 3 | Episode numbers on the signet card | A* chaser + parent |
| "The economics of Egypt v. [opponent]": match tickets, shirts, TV rights, around a big match | 3 | The Brief | Subject chooser |

**Gaps before the next run:**

- [ ] Connect Apify (repo secret `APIFY_TOKEN`) to unlock Instagram, TikTok, Facebook, likes, comments, dates and heatmaps
- [ ] Add 2–4 Cairo IGCSE tutors and 2 Egyptian finance TikTok creators to `intel/targets.yml`
- [ ] Open the top 3 outlier videos per account and fill full mechanic cards (hook words, first 3 seconds, structure)
- [ ] Re-run monthly; compare outliers month over month
